Danske Invest

Euro Sustainable High Yield Fund G (FI0008810163)

This fund is managed by Danske Invest Fund Management Ltd, part of the Danske Bank group.

Objectives and investment policy

Objectives

The target of investment activities is to achieve long-term value increase on the invested assets through active asset management pursuant to the Act on Common Funds and the fund's regulations.

Investment policy

The assets are diversified mainly in euro-denominated bonds, that have been issued by European companies and whose credit rating is no higher than Moody's Ba1, S&P BB+ or Fitch BB+. The bond issuer shall have a positive or an improving Environment, Social and Governance (ESG) profile. The management team selects securities using both financial and ESG criteria to assess risks and opportunities. The modified duration, which describes the interest rate risk of investments, may be a maximum of 10. The credit rating of the rated investment instruments invested in by the fund must be at least Moody's B3, S&P B- or Fitch B- on average. The returns on the fund's investments, such as dividends and interest, will be reinvested. The

fund's base currency is the euro.

It is generally expected that the fund's holdings may differ significantly from those of the benchmark, e.g. in relation to issuer, credit quality, countries and duration. The fund's performance may therefore differ from the benchmark. The fund suits investors who seek a return clearly higher than that offered by traditional bond investment, and can tolerate substantial value fluctuations or even decreases. The fund is suitable as part of a diversified investment portfolio. Investors may subscribe for and redeem fund units on every banking day.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Risk and reward profile

The fund is categorized as 4. The indicator illustrates the typical correlation between the risk and your potential return of the investment. The categorization is determined by the fluctuations in the fund's net asset value over the past five years and/or representative data.

Significant historical volatility equals high risk and low volatility equals

lower risk. Please note that the fund's categorization is not constant and the categorization may change over time. Historical performance data is not necessarily a reliable indicator of the future risk profile.

The risk indicator is purely a mathematical calculation and it does not take devaluations, political intervention and sudden fluctuations in interest rates and currencies into account. Risk class 1 is not a risk-free investment.

The principal risks of the fund are interest rate risk, credit risk and market risk. Changes in interest rates will affect the fixed income investments.

For further details about risk, please refer to the following section in the fund prospectus: "Principal risks of mutual funds."

General trading terms

Orders regarding fund units can be submitted in the manner specified in the section of the fund's regulations entitled "Subscription, redemption and switch of fund units".

Based on their return distribution, fund units are divided into either distribution units or growth units. No return is distributed on growth units; instead, all returns are reinvested in the fund to increase the value of the growth units. In contrast, the aim is that return is distributed annually on distribution units.
