Danske Invest Allocation

Horisont Aktie Class SA (LU1349504479)

This fund is managed by Danske Invest Management A/S, a subsidiary of Danske Bank A/S.

Objectives and investment policy

Objectives

The objective of this fund is to achieve above-market performance, while applying an opportunistic asset allocation strategy. The share class is accumulating.

Investment policy

The fund gains exposure, directly or through other funds, to equities. The fund only invests in underlying funds where ESG-related processes or criteria are applied. The fund may gain exposure to any sector and country, including emerging markets.

Specifically, the fund may invest up to 100% of net assets in equities and equity-related securities.

The fund promotes various environmental and social characteristics and good governance practices through a commitment to systematically identify and address sustainability factors throughout the investment management processes and through active ownership.

In actively managing the fund's portfolio, the management team

applies a flexible asset allocation that seeks to take full advantage of market changes and opportunities.

The fund generally expects that its holdings, and therefore its performance, may differ significantly from those of the benchmark.

The fund may use derivatives for hedging and efficient portfolio management, as well as for investment purposes.

The fund may invest in Chinese A-shares subject to quota and operational constraints, which may increase legal and counterparty risk.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Benchmark (for performance comparison)

60% MSCI AC World (net dividends reinvested) and 40% SIX Portfolio Return Index (gross dividends reinvested).

Risk and reward profile

The fund is categorized as 5. The indicator illustrates the typical correlation between the risk and your potential return of the investment. The categorization is determined by the fluctuations in the fund's net asset value over the past five years and/or representative data.

Significant historical volatility equals high risk and low volatility equals

lower risk. Please note that the fund's categorization is not constant and the categorization may change over time. Historical performance data is not necessarily a reliable indicator of the future risk profile.

The risk indicator is purely a mathematical calculation and it does not take devaluations, political intervention and sudden fluctuations in interest rates and currencies into account. Risk class 1 is not a risk-free investment.

The principal risks of the fund are equity risk, market risk, derivative risk and exchange rate risk. As the fund will invest its assets in the equity markets, the value of the fund may fluctuate according to market conditions.

For further details about risk, please refer to the following section in the fund's prospectus: "Risk Descriptions".
