Danske Invest

## Eliksir Fund of Hedge Funds G (AIF) (FI0008806393)

This fund is managed by Danske Invest Fund Management Ltd, part of the Danske Bank group.

### Objectives and investment policy

#### Objectives

The aim is to achieve a return on assets that exceeds the return of risk-free fixed income returns in all market conditions and is independent of general market performance through active asset management pursuant to the fund's regulations and the Act on Common Funds.

#### Investment policy

The assets are invested in the units of Finnish and foreign mutual funds whose investment strategy is to strive for absolute returns. The investment operations are based on the combination of various absolute return investment strategies, which are used to aim performance that is independent of the general development of the equity and fixed income markets. The Fund is a non-UCITS fund, whose assets can be less diversified than in an ordinary mutual fund. The returns, such as dividends and interest, will be reinvested. The

fund's base currency is the euro.

The fund is intended for investors who seek an investment alternative with a higher return expectation, tolerating value fluctuations or even decreases. The fund also suits investors who wish to improve the diversification of their investment portfolio and who seek returns for part of their portfolio that are independent of the markets. The fund is suitable as part of a diversified investment portfolio. Investors may subscribe for and redeem fund units on every banking day.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 3 years.

#### Benchmark

The fund has no benchmark.

### Risk and reward profile

The fund is categorized as 4. The indicator illustrates the typical correlation between the risk and your potential return of the investment. The categorization is determined by the fluctuations in the fund's net asset value over the past five years and/or representative data.

Significant historical volatility equals high risk and low volatility equals

lower risk. Please note that the fund's categorization is not constant and the categorization may change over time. Historical performance data is not necessarily a reliable indicator of the future risk profile.

The risk indicator is purely a mathematical calculation and it does not take devaluations, political intervention and sudden fluctuations in interest rates and currencies into account. Risk class 1 is not a risk-free investment.

The principal risks of the fund are equity risk, interest rate risk, credit risk, exchange rate risk and market risk. As the fund will invest its assets in alternatives investment assets, the risks of the fund also involves additional elements as liquidity and valuation risk.

For further details about risk, please refer to the following section in the fund prospectus: "Principal risks of mutual funds."
