High Yield Fund G (AIF) (FI0008808951)

This fund is managed by Danske Invest Fund Management Ltd, part of the Danske Bank group.

Objectives and investment policy

Objectives

The target of investment activities is to achieve long-term value increase on the invested assets through active asset management pursuant to the Act on Common Funds and the fund's regulations.

Investment policy

The assets are invested in Danske Invest Global High Yield Bonds Fund administered by Danske Invest Management A/S. The assets are mainly invested in high yield bond markets. The fund's assets are mainly invested in the USA. Underlying funds investments are hedged against Euro. The fund is a non-UCITS fund, whose assets can be less diversified than in an ordinary mutual fund. The underlying fund adheres to the Responsible Investment Policy of Danske Invest and restricts certain sectors and companies from its investment universe. The returns on the fund's investments, such as dividends and interest,

will be reinvested. The fund's base currency is the euro.

The fund is intended for investors who wish to exploit the opportunities offered by risk-bearing bonds and who can tolerate substantial value fluctuations or even decreases. The fund is suitable as part of a diversified investment portfolio. Investors may subscribe for and redeem fund units on every banking day.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Benchmark

Risk and reward profile

The fund is categorized as 4. The indicator illustrates the typical correlation between the risk and your potential return of the investment. The categorization is determined by the fluctuations in the fund's net asset value over the past five years and/or representative data.

Significant historical volatility equals high risk and low volatility equals lower risk. Please note that the fund's categorization is not constant and the categorization may change over time. Historical performance data is not necessarily a reliable indicator of the future risk profile.

The risk indicator is purely a mathematical calculation and it does not take devaluations, political intervention and sudden fluctuations in interest rates and currencies into account. Risk class 1 is not a risk-free investment.

The principal risks of the fund are interest rate risk, credit risk and market risk. Changes in interest rates will affect the fixed income investments.

For further details about risk, please refer to the following section in the fund prospectus: "Principal risks of mutual funds."

A significant level of the Funds investment is made in financial instruments, which are by their nature sufficiently liquid, yet which may under certain circumstances have a relatively low level of liquidity, so as to have an impact on the level of liquidity risk of the Fund as a whole.

General trading terms

Orders regarding fund units can be submitted in the manner specified in the section of the fund's regulations entitled "Subscription, redemption and switch of fund units".

Based on their return distribution, fund units are divided into either distribution units or growth units. No return is distributed on growth units; instead, all returns are reinvested in the fund to increase the value of the growth units. In contrast, the aim is that return is distributed annually on distribution units.
