Danske Invest Allocation SICAV

June Moderate Screened Class J-dkk (LU1806380595)

This fund is managed by Danske Invest Management Company (Société Anonyme), part of the Danske Bank group.

Objectives and investment policy

Objectives

The objective of this fund is to achieve long-term investment growth, while applying a defensive-to-balanced asset allocation strategy. The fund is accumulating.

Investment policy

The fund gains exposure to bonds and equities, with emphasis on bonds, by investing in other funds such as exchange-traded funds (ETF) and index-tracking funds. With these other funds, responsible investment and ESG principles are applied either at the securities selection or index construction level.

The fund may gain exposure to any credit quality, sector and country, including emerging markets.

Specifically, the fund's default asset allocation is 80% in bonds and

20% in equities, but this may be adjusted depending on the investment manager's market outlook.

The allocation to bonds and other debt instruments shall be 60% to 100% and the allocation to equities 0% to 40%.

When the fund invests in other funds that hold debt securities, at least 90% of these funds are either denominated in, or hedged into, EUR. However, currency risk can still arise from any non-EUR debt securities held by underlying funds.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Benchmark

The fund has no benchmark.

Risk and reward profile

The fund is categorized as 3. The indicator illustrates the typical correlation between the risk and your potential return of the investment. The categorization is determined by the fluctuations in the fund's net asset value over the past five years and/or representative data.

Significant historical volatility equals high risk and low volatility equals lower risk. Please note that the fund's categorization is not constant

and the categorization may change over time. Historical performance data is not necessarily a reliable indicator of the future risk profile.

The risk indicator is purely a mathematical calculation and it does not take devaluations, political intervention and sudden fluctuations in interest rates and currencies into account. Risk class 1 is not a risk-free investment.

The principal risks of the fund are equity risk, interest rate risk, credit risk, market risk, exchange rate risk and investment style risk. As the fund will invest its assets in both the fixed income and equity markets, the changes in the market conditions and interest rates will affect the return of the fund.

For further details about risk, please refer to the following section in the fund's prospectus: "Risk Descriptions".

Charges

The charges you pay are used to cover the costs of running the fund, including marketing costs and distribution. These charges reduce the potential growth of your investment. The ongoing charges are based on the previous year's expenses. The figure may vary from year to year.
