Danske Invest

2020 Fund G (FI0008800818)

This fund is managed by Danske Invest Fund Management Ltd, part of the Danske Bank group.

Objectives and investment policy

Objectives

The investment activities aim, through active asset management, to achieve the best possible return by the end of 2020, after which every attempt will be made to secure the fund's accumulated assets by investing in fixed income-based investments.

Investment policy

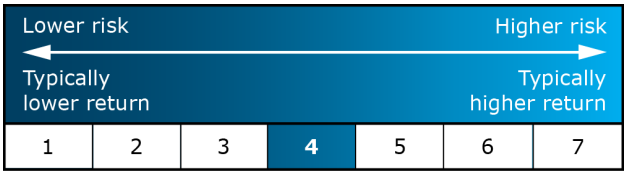

The assets are invested in the units of Finnish and foreign mutual funds that invest in the international equity and fixed income markets. Assets may be invested directly in fixed income, equities and derivatives. The returns, such as dividends and interest, will be reinvested. At first, the principal weighting will be in equity investments, but after 2010 their weighting will be reduced and the weighting of fixed income will be increased gradually. After 2020, assets will be invested only in the fixed income markets. The fund's base currency is the euro.

The fund suits investors with a long investment horizon and who seek high returns on their investment, while tolerating significant value fluctuations or even decreases. The fund is well-suited for pension saving or other target-oriented saving, in which the target year is around 2020. Recommendation: The recommended investment horizon is until 2020, or at least for more than five years. Investors may subscribe for and redeem fund units on every banking day.

Benchmark

The fund has no benchmark.

Risk and reward profile

The fund is categorized as 4. The indicator illustrates the typical correlation between the risk and your potential return of the investment. The categorization is determined by the fluctuations in the fund's net asset value over the past five years and/or representative data.

Significant historical volatility equals high risk and low volatility equals lower risk. Please note that the fund's categorization is not constant and the categorization may change over time. Historical performance data is not necessarily a reliable indicator of the future risk profile.

The risk indicator is purely a mathematical calculation and it does not take devaluations, political intervention and sudden fluctuations in interest rates and currencies into account. Risk class 1 is not a risk-free investment.

The principal risks of the fund are equity risk, market risk and exchange rate risk. As the fund will invest its assets in the equity markets, the value of the fund may fluctuate substantially according to market conditions. The fund may also invest in securities not denominated in euros, in which case its investments will be subject to exchange rate risk.

For further details about risk, please refer to the following section in the fund prospectus: "Principal risks of mutual funds."

General trading terms
Orders regarding fund units can be submitted in the manner specified in the section of the fund's regulations entitled "Subscription, redemption and switch of fund units".

Based on their return distribution, fund units are divided into either distribution units or growth units. No return is distributed on growth units; instead, all returns are reinvested in the fund to increase the value of the growth units. In contrast, the aim is that return is distributed annually on distribution units.
