Danske Invest Allocation SICAV

June Defensive Class J-dkk (LU1446763606)

This fund is managed by Danske Invest Management Company (Société Anonyme), part of the Danske Bank group.

Objectives and investment policy

Objectives

The objective of this fund is to generate a stable return in the long term through active asset allocation. The fund is accumulating.

Investment policy

The fund invests globally in bonds and equities through open-ended UCITS ETFs and Index UCITS funds.

Screening in accordance with the RI (Responsible Investments) policy of the fund does not apply to this fund's investments.

The fund invests indirectly in both bonds and equities with a strategic allocation of 90% in bonds and 10% in equities. The actual allocation will vary from this strategic allocation. The allocation to bonds shall as

a minimum be 75% and the allocation to equities must not exceed 25%.

The modified duration of the fund's investments in bonds, including cash holdings, must be at least 3 years.

At least 90% of the fund's investments in bonds must be denominated in or hedged to EUR.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 3 years.

Benchmark

The fund has no benchmark.

Risk and reward profile

The fund is categorized as 3. The indicator illustrates the typical correlation between the risk and your potential return of the investment. The categorization is determined by the fluctuations in the fund's net asset value over the past five years and/or representative data.

Significant historical volatility equals high risk and low volatility equals lower risk. Please note that the fund's categorization is not constant and the categorization may change over time. Historical performance data is not necessarily a reliable indicator of the future risk profile.

The risk indicator is purely a mathematical calculation and it does not take devaluations, political intervention and sudden fluctuations in

interest rates and currencies into account. Risk class 1 is not a risk-free investment.

The fund's risk class categorization indicates that the value of investments in equities and bonds can both rise and fall, a.o. due to circumstances in individual companies or bond issuers or political and regulatory changes.

Furthermore, macro-economic and financial conditions, including the development in global interest rates, may affect the value. The value of any single share may change more than the overall market and thus give a return that differs from the market. Investments in bonds involves a risk that the issuers (states, mortgage credit institutes or companies) have their credit rating reduced, or that they cannot meet their payment obligations.

For further details about risk, please refer to the following section in the fund's prospectus: "Investment Policy and Restrictions – Risk Factors – Risk Management".
