

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Danske Invest SICAV

Global Alternative Opportunities Class WA-sek h p (LU2401888057)

Class of Global Alternative Opportunities

This fund is managed by Danske Invest Management A/S, a subsidiary of Danske Bank A/S.

Objectives and investment policy

Objectives

The objective of this fund is to achieve investment growth in any type of market condition (absolute return). The share class is accumulating.

Investment policy

The fund targets alternative beta yields embedded in equity and volatility markets, as well as in interest rate, inflation, credit and currency markets with a focus on developed markets.

The fund is categorized under SFDR article 6. The fund follows Danske Invest's responsible investment policy.

In actively managing the fund's portfolio, the management team applies a flexible and dynamic allocation and invests in alternative beta strategies that seek to take advantage of both positive and negative market movements, as well as other market opportunities, while

mitigating downside risk during adverse market conditions.

The fund may use derivatives for hedging and efficient portfolio management, as well as for investment purposes.

The main part of the share class' NAV will be hedged against the base currency of the fund. However, the share class remains exposed to the currencies of the investments in the fund.

Recommendation: This fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Benchmark

The reference benchmark used for performance fee calculation is the Euro short-term rate. The fund is managed without any constraint related to the benchmark.

Risk and reward profile

The fund is categorized as 5. The indicator illustrates the typical correlation between the risk and your potential return of the investment. The categorization is determined by the fluctuations in the fund's net asset value over the past five years and/or representative data.

Significant historical volatility equals high risk and low volatility equals lower risk. Please note that the fund's categorization is not constant and the categorization may change over time. Historical performance data is not necessarily a reliable indicator of the future risk profile.

The risk indicator is purely a mathematical calculation and it does not take devaluations, political intervention and sudden fluctuations in interest rates and currencies into account. Risk class 1 is not a risk-free investment.

The principal risks of the fund are equity risk, interest rate risk, credit risk, leverage risk, derivative risk and exchange rate risk. As the fund will invest its assets in both the fixed income and equity markets, the changes in the market conditions and interest rates will affect the return of the fund. When investing in the volatility of a certain asset, the fund may have exposure towards the future volatility of that asset. A long position in volatility implies that if the future volatility of a certain asset increases/decreases, then the fund will make a gain/loss, and vice-versa for a short position.

For further details about risk, please refer to the following section in the fund's prospectus: "Risk Descriptions".

Charges

The charges you pay are used to cover the costs of running the fund, including marketing costs and distribution. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge 1)	0.00%
Exit charge 2)	0.00%
1) This is the maximum that might be taken out of your money before it is invested. 2) This is the maximum that might be taken out of your money before the proceeds of your investment are paid out.	
Charges taken from the fund over a year	
Ongoing charge	0.75%
Charges taken from the fund under certain specific conditions	
Performance fee	20% of the outperformance against the hurdle rate.

The ongoing charges are based on the previous year's expenses. The figure may vary from year to year.

The ongoing charges excludes performance related fees and transaction costs including brokerage fees and bank charges on securities transactions.

The entry and exit charges shown are maximum figures. In some

cases you may pay less. For further details please consult your financial adviser or distributor.

In addition, a conversion fee may be charged in relation to conversions as described in the prospectus.

For more information about charges, please refer to the following section in the fund's prospectus: "Fund Fees and Costs".

Past performance

Launch date

n/a.

Calculation method

Below is shown the fund's and any benchmark's annual returns in percent including dividends if any. Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation. Past performance has been calculated in: SEK.

Disclaimer

Past performance is not a reliable indicator of future results.

Since the fund has existed less than a calendar year there are insufficient data to provide useful information regarding past performance.
